## CLAIMS

- 1. An acidic protein food or drink comprising one or more of salts or saccharides selected from the group consisting of water-soluble polysaccharides, water-soluble basic salts, alkali metal salts of organic acids, basic monosaccharides and basic oligosaccharides, and acidic-soluble protein.
- 2. The acidic protein food or drink according to claim 1, wherein the acidic-soluble protein is that of soybean origin.
  - 3. The acidic protein food or drink according to claim 1, wherein the acidity is in the range of pH 2.0-4.5.
  - 4. The acidic protein food or drink according to claim 1, wherein the food or drink is a beverage, an aqueous phase-containing emulsion or a frozen dessert.
- 5. A powder material comprising one or more of salts or saccharides selected from the group consisting of water-soluble polysaccharides, water-soluble basic salts, alkali metal salts of organic acids, basic monosaccharides and basic oligosaccharides, and acidic-soluble protein.
- 6. An acidic-soluble protein material with relieved astringency comprising one or more of added salts or saccharides selected from the group consisting of water-soluble polysaccharides, water-soluble basic salts, alkali metal salts of organic acids, basic monosaccharides and
